

Dear FCC,I am writing to let you know how I benefit from XM radio. I am a frequent traveler. With XM radio, I am able to hear a specific city's weather before I leave my house. When I arrive in the city, I rent Avis cars and am able to continue hearing the cities traffic and weather, with XM radio. XM can provide me important travel information, both before I leave home and after I arrive. This kind of service is not available anywhere else. I pay XM satellite radio for these valuable services and it should not be up to the National Association of Broadcasters to dicated that I not be permitted these services. I respectfully urge you to REJECT the NAB's PETITION 04-160. I need, demand, and deserve the kind of programming XM provides. Thank you for your time.

Sincerely,
Pamela Love
